

Question	Answer
Please explain more about the Average income feature of KWIC.	<p>Average - used for clients whose monthly income varies.</p> <p>Enter the income amount in the month for which the income applies. If the client received no income for one or more months, enter 0 for that/those months.</p> <p>KWIC calculates the average monthly income by adding the amounts entered for each month and then dividing by the number of months entered. For example, Sally had to stop providing child care for several weeks so her income from child care varied considerably in the past months: Jan = 300, Feb = 227, Mar = 0, April = 150.</p> <p>KWIC calculates $(300+227+0+150) / 4 = 169$ per month and sets the “period” as Average.</p>  <p>If you want an average of 2 months salary then put in only 2 months. If you want the income averaged over the whole year and some months there was zero income, you must put in 0 for those months. If you leave a month blank then that is not averaged in.</p>
I can't assign a food package for this exclusively breastfeeding mom. I certified her so what's going wrong?	<p>Infant/Child Mother Link</p> <p>Linking the infant or child with the mother is important for:</p> <ul style="list-style-type: none">◆ Collecting data for the PedNSS and PNSS reports.◆ Assigning an exclusive breastfeeding food package. If a breastfeeding mother has no infant marked as exclusively breastfeeding

Question	Answer
	<p>associated with her, there will be no breastfeeding food package available.</p> <p>More information about assigning this link can be found on KDHE - WIC website http://www.kdheks.gov/nws-wic Look for the Training link in the left column and select the Certification Guides module.</p> <p>Be sure to complete the Infant/Child Mother Link when certifying an infant or child.</p>
